FINISHING SCHOOL

Applying an Aerosol Lacquer.

1

1 Aerosol lacquers such as Acrylic Gloss Lacquer, Acrylic Satin Lacquer and Melamine Gloss Lacquer are designed to be easy to use and to give a tough, hardwearing finish.

2

2 Always shake the can well before use, and spray from a distance of 6-12 inches, 15-30cm. Vary the distance depending on the size of the item and the ambient temperature; this will avoid the lacquer drying before it hits the surface and leaving a pebbledash effect. Apply with the lathe running or stopped depending on your preference.

3

3 If you want to apply more than one coat, which is usually recommended, allow the lacquer to dry and gently cut back using a fine abrasive.

4

4 Apply a second coat as before, which will result in a brighter finish (unless using satin lacquer of course!).

5

5 Lacquer finishes are ideal for items that could be subject to a lot of handling or occasional water contact. Perfect on carving, texture or a natural edge. Gloss lacquers can be enhanced further by using Burnishing Cream without losing any of the hardwearing properties.
