Buffing Wheel Kit

1

1 The Buffing Wheel Kit contains everything you need to get started with buffing your work to a deep, lasting shine. It's not only a great shortcut to a great finish on new work, it's also perfect for refurbishing older items in needs of some TLC - without having to worry about remounting them.

2

2 Made in the UK and zinc plated for protection, the Large Mandrel fits any chuck on either the 18 or 25mm section. No need for a draw bar or live centre to hold it in place.

3

3 The Kit comes complete with three 8 inch wheels, each of a different cloth grade to help prepare and then polish your work to perfection. The wheels come ready assembled to quickly screw into the mandrel.

4

4 The first two wheels use a special compound to help cut the surface back to make it extra smooth and the third wheel works with Carnuaba Wax to give a protective shine.

5

5 Also included in the kit is a smaller mandrel for a jacobs chuck, to allow the system to be used in a pillar or power drill.
